Name:	Prerna Sunil Jadhav
Sap Id:	60004220127
Class:	S. Y. B.Tech (Computer Engineering)
Course:	Computer Networks (DJ12CEL405)
Date of Performance:	
Date of Submission:	
Experiment No.:	08
Aim:	RIP configuration using packet tracer

**AIM: RIP CONFIGURATION USING PACKET TRACER**

THEORY:
- ✓ Routing Information Protocol (RIP) is a dynamic routing protocol that uses hop count as a routing metric to find the best path between the source and the destination network.
- ✓ It is a distance-vector routing protocol that has an AD value of 120 and works on the Network
- ✓ layer of the OSI model.
- ✓ RIP uses port number 520.
- ✓ Hop count is the number of routers occurring in between the source and destination network. The path with the lowest hop count is considered as the best route to reach a network and therefore placed in the routing table.
- ✓ RIP prevents routing loops by limiting the number of hops allowed in a path from source and destination.
- ✓ The maximum hop count allowed for RIP is 15 and a hop count of 16 is considered as network unreachable.
- ✓ Features of RIP
    - o Updates of the network are exchanged periodically.
    - o Updates (routing information) are always broadcast.
    - o Full routing tables are sent in updates.
    - o Routers always trust routing information received from neighbour routers. This is also known as Routing on rumors.
- ✓ RIP versions:
    - o There are three versions of routing information protocol – RIP Version1, RIP Version2, and RIPng.
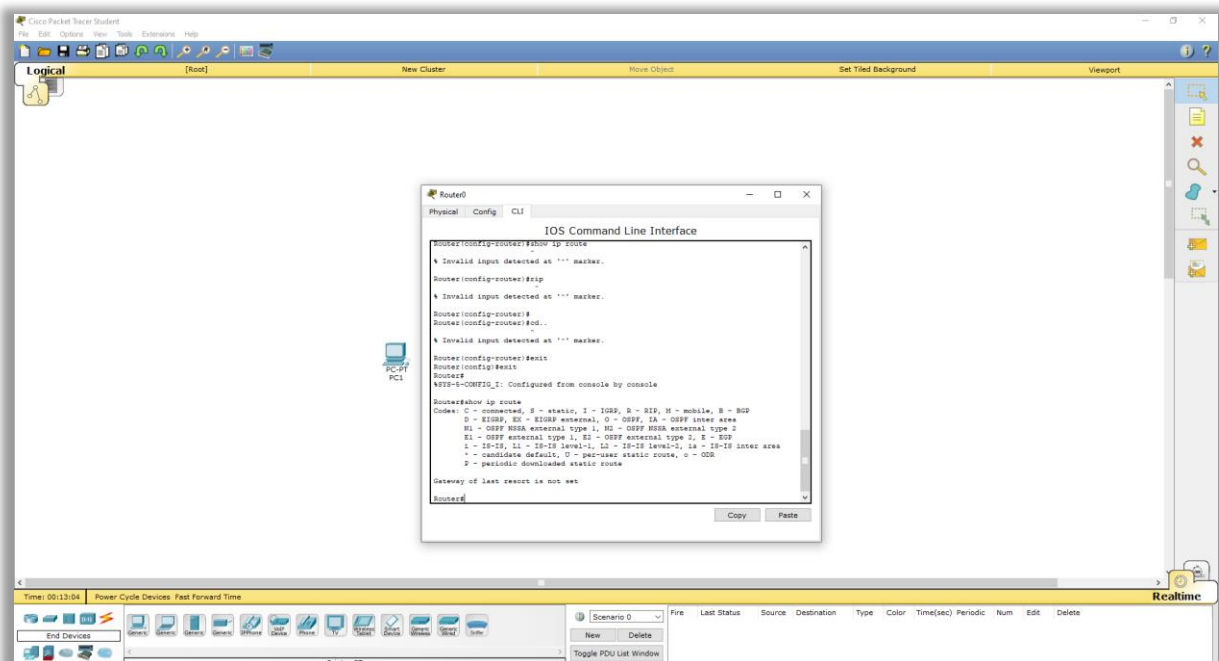

Shri Vile Parle Kelavani Mandal's
DWARKADAS J. SANGHVI COLLEGE OF ENGINEERING
(Autonomous College Affiliated to the University of Mumbai)
NAAC Accredited with "A" Grade (CGPA : 3.18)

Academic Year: 2022-2023

The Network:

Configuring Router 1:

R1(config)#int fa0/0
R1(config-if)#ip address 10.0.0.1 255.0.0.0
R1(config-if)#int serial 0/0/0
R1(config-if)#ip add 20.0.0.1 255.0.0.0
R1(config-if)#no shut

Configuring Router 2:

```
R2(config)#
R2(config)#int fa0/0
R2(config-if)#ip add 30.0.0.1 255.0.0.0
R2(config-if)#no shut

R2(config-if)#
R2(config-if)#int serial 0/0/0
R2(config-if)#ip add 20.0.0.2 255.0.0.0
R2(config-if)#no shut
```
